

SOLAR INSTALLATION POLICY

Solar is encouraged on the Ridge. The following policy applies to installations in the above Precincts:

1. Black framed or frameless panels.
2. The glass panels themselves must be rendered black;
3. The PV cell itself must be of the 'black' type rather than the blue-ish ones.
4. Tilt angle not to exceed 5 degrees
5. Assembled in an architectonic manner to respect the 5th elevation namely, the roof.
6. All cabling and other reticulation to be screened/hidden from view.

Details of the panels, fixings and layout to be submitted to the Design Review Panel for approval.
